## 1. Introduction

### 1.1 Overview

An uninterrupted power source is necessary for modern equipment to function properly in this age of advanced technology. Continuous power supply is essential in many businesses, including the IT industries, cold storage, server rooms, hospitals, etc. to enable efficient work and prevent catastrophic events. Many industry workers rely on GSM-based short message notifications for power outages or restorations so they can act quickly to restore power supply using an alternate power source. Such a Power Failure Alert Device having a user-friendly interface has worked well for many applications.

### 1.2 Key Features

- Power on/off alert over SMS and missed call notification.
- Alert messages/missed call can be sent up to 5 mobile numbers.
- LED indication for network and power.
- User can check live status by sending an SMS/Missed call to the device.
- User can change registered mobile numbers through SMS by using the SMS command.
- Can be customized to suit specific customer requirements.

### 1.3 Package Contents

- Power failure Alert device
- User Manual
- SIM card (not included)

## 2. Getting Started

### 2.1 SIM Card Insertion & Battery Connection

- Open the Device to insert the SIM card and Battery connection.
- **SIM Card Insertion:** Insert a compatible SIM card into the designated slot on the device. Ensure that the SIM card is unlocked and has sufficient credit for sending SMS or making calls.
- **Battery Connection:** Connect Battery Connection.
- After inserting the SIM card and connecting the battery, pack the device.

### 2.2 Installation

- Plug in the Power Alert device in a location with a stable cellular network signal. It's essential to choose a spot with good reception to ensure reliable alerts.

### 2.3 Powering Up

- Before configuring the provided power alert device, connect it to a power source and let it charge for 10-15 minutes. Power Alert comes with a built-in rechargeable battery to ensure continuous operation during power outages.

### 2.4 LED Indicators

LED	Status	Meaning
Red	Fast blink	Network not available
	Slow blink	Network available
Green	Continuous ON	Power available
	Continuous OFF	Power not available
	Blink	While sending message

## 3. Configuration

### 3.1 Recipient mobile number Setup

- In the setup, the user can input up to 5 mobile numbers to receive alerts.
- Send an SMS to the device in the below format to get an alert in your preferred mobiles. ( by default password is “12345” )
- **SMS Format:** “PasswordALERT:Mobile no.1,Mobile no.2,Mobile no.3,Mobile no.4,Mobile no.5:”
- You will receive an SMS as “Successfully updated your number” on all registered mobile numbers.
- **SMS Example:**

12345ALERT:9998823997,  
9033520529,8128772221,88496705  
88,7046960991:

Successfully updated your number.

10:58 am

### 3.2 Password setting

- Send an SMS from the registered mobile number to the device in the below format to change the password.
- **SMS format:** “OldPasswordPASS:NewPassword:” (by default password is “12345” )

- You will receive an SMS as “Password changed successfully”.
- **SMS Example :**

12345PASS:56789:

Password changed successfully.

11:00 am

**(NOTE: Password should be 5 digits only)**

### 3.3 Configuring Device Modes:

- Users have the option to easily switch between SMS and missed Call modes using a simple process. By default, both modes are activated.

#### 3.3.1 SMS mode setting

##### ➤ **Activating SMS Mode:**

- Text the SMS command in the below format to turn on the SMS mode.
- **Format: PasswordSMSON**
- You will receive an SMS as “Configuration done”.
- **SMS Example:**

12345SMSON

Configuration Done.

11:30 am

##### ➤ **Deactivating SMS Mode:**

- Text the SMS command in the below format to turn off the SMS mode.
- **Format: PasswordSMSOFF**
- You will receive an SMS as “Configuration done”.
- **SMS Example:**

12345SMSOFF

Configuration Done.

11:29 am

#### 3.3.2 Missed call Mode:

##### ➤ **To Activate missed call Mode:**

- Text the SMS command in the below format to turn on the missed call mode.
- **Format: PasswordCALLON**
- You will receive an SMS as “Configuration done”.
- **SMS Example:**

12345CALLON

Configuration Done.

11:31 am

- **To Deactivate missed call Mode:**
  - Text the SMS command in the below format to turn off the missed call mode.
  - **Format: PasswordCALLOFF**
  - You will receive an SMS as “Configuration done”.
  - **SMS Example:**

12345CALLOFF

Configuration Done.

11:30 am

### 3.4 Testing the System

- To test the device to ensure it is configured correctly follow section 4.4. The device will respond with power status.

## 4. Device Operation

### 4.1 SMS Alert

- The device will send an SMS to all configured numbers to ensure immediate notification as given example.
- **Example:**
  - **Power on:** When the power is UP, the user will receive an alert SMS as shown in the example below.

Power on at Date : 05/02/24, Time : 11:04:10.

- **Power off:** When the power is DOWN, the user will receive an alert SMS as shown in the example below.

Power off at Date : 05/02/24, Time : 11:11:33.

11:11 am

## 4.2 Missed call alert

- You will also receive alerts via missed calls to all your configured mobile numbers.

## 4.3 Monitor Power status manually

### 4.3.1 Method 1

- Send an SMS command (GETDATA) to the device to get the current status.

➤ **Example:**

- **If Power is ON:** the user will receive the current power status as shown below example.

GETDATA

Power : Available at Date : 05/02/24,  
Time : 11:07:33.

11:07 am

- **If power is OFF:** the user will receive the current power status as shown below example.

GETDATA

Power : Not Available at Date :  
05/02/24, Time : 11:02:07.

11:02 am

### 4.3.2 Method 2

- User can monitor the current power status by giving missed call to the device.

➤ **Example:**

- **If Power is ON:** The device will send an alert SMS as shown in the below example.

Power : Available at Date : 05/02/24,  
Time : 11:07:33.

11:07 am

- **If power is OFF:** The device will send an alert SMS as shown in the below example.

Power : Not Available at Date :  
05/02/24, Time : 11:02:07.

11:02 am

#### 4.4 Get device information

- Send an SMS to the device in the below format to get all information like password, registered mobile numbers, and mode selection status.
- **SMS format** : “Getinfo”
- **Example**:

Getinfo

```
M:9998823997,9033520529,  
8128772221,8849670588,#P:  
56789#A:internet#E1:  
862493051814071#Q:14#S:1 #C:  
1 #EM:0#
```

11:13 am

[ Here M is for mobile number, P is for Password,

S is for SMS ( S:1 = SMS on, S:0 = SMS off ),

C is for Call ( C:1 = Call on, C:0 = Call off ),

EM is for Email ( EM:1 = Email on, EM:0 = Email off ) ]

## 5. Troubleshooting

### 5.1 No SMS Alert Received

- Check the SIM card balance, network connectivity using LED indication, and recipient number configuration. Ensure the call alert settings are configured correctly.

### 5.2 False Alerts

- Ensure the device is not placed in an area with frequent power fluctuations.

### 5.3 LED Indicator Issues

- Refer to Section 2.4 for details on LED indicators. If issues persist, contact customer support.

### 5.4 Invalid command issue:

- Ensure the format of the SMS command given by the user is as given in the user manual
- **Note**: All SMS commands are case-sensitive.

## 6. Technical Specifications

<b>POWER</b>	
Phase	Single
Operating Voltage Range	100 to 240 V AC
Battery Backup	Chargeable 3.7 VDC 1100 mAh Li-Ion
Battery Standby Time	36 hours
<b>MODULE SPECIFICATIONS</b>	
Module	GSM Module
SIM Card	Micro SIM (VI, Airtel, BSNL )
<b>ALERT MESSAGE SPECIFICATION</b>	
<ul style="list-style-type: none"> <li>• Cellular message alert notifications with date and time</li> <li>• Message alert configurable for 1 to 5 Contacts</li> <li>• 10-digit mobile contact numbers are supportable</li> </ul>	
Message Alerts	<ul style="list-style-type: none"> <li>• POWER on with Date and Time Stamp</li> <li>• POWER off with Date and Time Stamp</li> </ul>
Message Configuration	Simple and easily configurable
<b>PHYSICAL DIMENSIONS</b>	
Housing	Plastic
Dimension	83 x 71 x 63 mm
Weight	130 gm
<b>ENVIRONMENTAL</b>	
Storage Temperature	-40°C to +85°C
Operating Temperature	0°C to +70°C
Humidity	5% - 95% (non-condensing)

## 7. Warranty and Support

- A warranty period for our company's products is within 12 months from the date of purchase.
  - **The following are not covered by a free warranty period.**
    - Hardware failure due to inconsistent usage environment.
    - Failure or damage caused by a bad power environment.
    - Failure or damage caused by unauthorized disassembly, repair, or override of authority, modification, or abuse.
  
- ❖ Thank you for choosing Power Alert! We hope this device enhances your peace of mind by keeping you informed about your power status wherever you are.
